Re: Shale Mine, Wyoco Petroleum Corp., DOE/019/012, Grand
County, Utah

On February 10, 1986, Tom Suchoski and Dave Hooper of the Division staff attempted to located the DOE proposed by Wyoco Petroleum, in February of 1981. This DOE site consisted of a one acre disturbance for the purpose of excavating shale to be used in the construction of access roads and a drill pad for an oil well. The site is located in the southwest of the southeast quarter of Section 16, Township 23 South, Range 17 East, in Grand County, Utah. In evaluating site it revealed there was minimal disturbance that was done approximately five years ago. The excavation was not readily visible and had started to revegetate naturally. As Wyoco Petroleum is no longer in business (personal Communication with Dianne R. Nielson, consultant for Wyoco Petroleum), it is recommended that this file be closed and archived.
